Contents of Volume 134

Research Articles

H. Mohamedeen and R.G. Hartnoll (U.K.)
Larval and postlarval growth of individually reared specimens of the common shore crab *Carcinus maenas* (L.) 1

L.S. Peck and L.J. Holmes (U.K.)
Seasonal and ontogenetic changes in tissue size in the Antarctic brachiopod *Liothyrella uva* (Broderip, 1833) 25

C.A. Butman (U.S.A.)
Sediment-trap experiments on the importance of hydrodynamical processes in distributing settling invertebrate larvae in near-bottom waters 37

K. Wada and D. Wowor (Indonesia, Japan)
Foraging on mangrove pneumatophores by ocypodid crabs 89

H. Mukai, I. Koike, M. Nishihiri and S. Nojima (Japan)
Oxygen consumption and ammonium excretion of mega-sized benthic invertebrates in a tropical seagrass bed 101

C.D. Amsler and M. Neushul (U.S.A.)
Diel periodicity of spore release from the kelp *Nereocystis luetkeana* (Mertens) Postels *et* Ruprecht 117

M.P. Lesser and J.M. Shick (U.S.A.)
Photoadaption and defenses against oxygen toxicity in zooxanthellae from natural populations of symbiotic cnidarians 129

G.F. Riedel, J.G. Sanders and R.W. Osman (U.S.A.)
The role of three species of benthic invertebrates in the transport of arsenic from contaminated estuarine sediment 143

K.M. Miller and T.H. Carefoot (Canada)
The role of spatial and size refuges in the interaction between juvenile barnacles and grazing limpets 157

A.J. Underwood and M.G. Chapman (Australia)
Experimental analyses of the influence of topography of the substratum on movements and density of an intertidal snail, *Littorina unifasciata* 175

K.A. McGuinness and A.R. Davis (Australia)
Analysis and interpretation of the recruit– settler relationship 197

L. Neuberger-Cywiak, Y. Achituv and L. Mizrahi (Israel)
The ecology of *Domax trunculus* Linnaeus and *Domax semistriatus* Poli from the Mediterranean coast of Israel 203

J.M. Lough and D.J. Barnes (Australia)
Possible relationships between environmental variables and skeletal in a coral colony from the central Great Barrier Reef 221
